### **1. Nature of Operations and Going Concern**

Southern Silver Exploration Corp. (the "Company") is an exploration stage company incorporated under the laws of British Columbia, Canada. The Company's principal business activities include the acquisition, exploration, and development of natural resource properties located in Mexico and the United States. The Company's registered office is 1710 - 1177 West Hastings Street, Vancouver, British Columbia, Canada, V6E 2L3.

The business of exploring for minerals involves a high degree of risk and there can be no assurance that any of the Company's current or future exploration programs will result in profitable mining operations. The recoverability of amounts shown for mineral properties is dependent upon the discovery of economically recoverable reserves, the ability of the Company to obtain financing to complete their exploration and development, and establish future profitable operations, or realize proceeds from their sale. The carrying value of the Company's mineral properties does not reflect present or future value.

These condensed consolidated interim financial statements were prepared on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. As at October 31, 2013, the Company had a working capital deficiency of \$346,494 (April 30, 2013 - \$726,154). The Company incurred a net loss of \$624,171 for the six months ended October 31, 2013 (2012 - \$805,989) and had an accumulated deficit of \$28,284,422 as at October 31, 2013 (April 30, 2013 - \$27,739,367).

As at October 31, 2013, the Company does not have sufficient working capital to meet its administrative overheads and continue its exploration programs. The Company has relied mainly upon the issuance of share capital to finance its activities. Future capital requirements will depend on many factors including the Company's ability to execute its business plan. The Company will be required to issue share capital to finance future activities through private placements and the exercise of options and warrants. There can be no assurance that such financing will be available to the Company and, therefore, a material uncertainty exists that casts substantial doubt over the Company's ability to continue as a going concern.

These condensed consolidated interim financial statements do not include the adjustments to assets and liabilities that would be necessary should the Company be unable to continue as a going concern.

### **2. Basis of Preparation**

These condensed consolidated interim financial statements were prepared in accordance with International Accounting Standards 34: *Interim Financial Reporting* on a historical cost basis using the accrual basis of accounting, except for cash flow information and financial instruments measured at fair value, and include the accounts of the Company and its wholly-owned integrated subsidiaries: Minera Plata del Sur S.A de C.V. and Exploraciones Magistral S.A de C.V., both incorporated in Mexico, Southern Silver Exploration (US) Corp., incorporated in the United States, and Southern Silver Projects Ltd. and Southern Silver Holdings Ltd., both incorporated in the British Virgin Islands.

All inter-company transactions and balances have been eliminated upon consolidation. The Company's functional and presentation currency is the Canadian dollar.

### 2. Basis of Preparation, continued

These condensed consolidated interim financial statements do not include all of the information required for complete annual consolidated financial statements in accordance with International Financial Reporting Standards ("IFRS") and, therefore, should be read in conjunction with the Company's audited annual consolidated financial statements for the year ended April 30, 2013.

The same accounting policies are used in the preparation of these condensed consolidated interim financial statements as for the most recent audited annual consolidated financial statements and reflect all the adjustments necessary for fair presentation of the results for the interim periods presented.

### 3. Marketable Securities

On January 14, 2013, the Company entered into an agreement and granted Desert Star Resources Ltd. ("Desert Star") an option to acquire up to a 70% interest in the Oro property (Note 5(c)). As consideration, Desert Star issued 100,000 common shares to the Company.

	\$	\$	\$	\$	\$	\$
Desert Star	11,000	6,000	17,000	11,000	(2,000)	9,000

### 4. Reclamation Bonds

The Company has posted non-interest-bearing reclamation bonds as security for future reclamation costs that are held in trust to be released after required reclamation is satisfactorily completed as follows:

- With respect to the 1% net smelter return ("NSR") royalty payable on the El Magistral mineral concession (Note 5(b)), a bond of \$42,015 (Mexican peso 523,778) (April 30, 2013 - \$43,494 (Mexican peso 523,778)) is being held in escrow by the Mexican government.
- With respect to the American Mine claims (Note 5(c)), a bond of \$nil (April 30, 2013 - \$44,250 (US \$43,920)) was being held in escrow by the US government. The bond was returned during the period as Desert Star assumed responsibility for future reclamation costs (Note 5(c)).
- With respect to a proposed project in New Mexico, a bond of \$nil (April 30, 2013 - \$31,324 (US \$31,092)) was being held in escrow by the US government. The bond was returned during the period.

### **5. Mineral Properties, continued**

#### **(a) Cerro Las Minitas - Mexico, continued**

Pursuant to an agreement dated October 19, 2012, the Company granted Freeport-McMoRan Exploration Corporation ("FMEC") the right to earn an indirect 70% interest in the property.

FMEC has the option to earn respective 51% and 19% indirect interests in the property through the acquisition of common shares of a subsidiary of the Company which has the right to purchase a 100% interest in the property.

To acquire the initial 51% interest FMEC shall:

- (i) Pay to the Company US \$600,000 as a deduction from work expenditure commitments (paid), US \$100,000 on or before October 19, 2013 (paid), US \$200,000 on or before October 19, 2014, and US \$300,000 on or before October 19, 2015;
- (ii) Incur exploration expenditures of US \$1,500,000 on or before October 19, 2013 (incurred), an additional US \$1,300,000 on or before October 19, 2014, and an additional US \$1,600,000 on or before October 19, 2015; and
- (iii) Pay the remaining option payments to the optionor of the property (\*) (as a deduction from work expenditure commitments).

To acquire the additional 19% interest, FMEC shall elect to do so within 90 days from the date of acquisition of the initial 51 % interest and:

- (i) Pay to the Company US \$1,000,000 on or before October 19, 2022; and
- (ii) Complete on or before October 19, 2022, a feasibility study and incur additional exploration expenditures of at least US \$19,000,000.

During September 2013, the Company received notice from FMEC that its affiliate had acquired an interest in additional mineral rights ("El Sol Concession") within the defined area of interest. FMEC offered, and the Company agreed, to include the El Sol Concession under the agreement.

FMEC's interest in the El Sol Concession is an option to acquire a 100% interest for cumulative payments of US \$2 million, payable over a three year period. To the extent paid by FMEC, these will be counted as a credit towards its earn-in of the Cerro Las Minitas property.

Upon acquisition of the initial 51% interest, and should FMEC elect to earn the additional 19% interest, operations on the property will be conducted pursuant to a shareholders' agreement with each shareholder bearing its proportionate share of further expenditures. Provision for dilution of a participating interest will apply and if a participating interest is diluted to less than 10%, that participating interest will be converted to a 2% NSR.

### **5. Mineral Properties, continued**

#### **(b) Minas de Ameca (Magistral Properties) - Mexico**

Pursuant to an agreement dated July 4, 2006, as amended, the Company could earn a 65% interest in the Magistral I mining exploration concession ("Magistral") located in Mexico.

On October 18, 2006, the Company purchased a 100% interest in the 1,366 hectare El Magistral mineral concession in the Ameca region in the State of Jalisco, Mexico. The mineral concession is subject to a 1% NSR payable to the Mexican government.

The Company has not been compliant with some underlying terms of the Magistral agreement since July 2011 and has been negotiating a revised agreement since that date. However, the Company is now currently in the process of returning the Magistral concession to the optionor which may include ownership of the El Magistral concession.

Accordingly, the Company has recorded an impairment provision against all capitalized costs relating to these claims totalling \$369,610.

#### **(c) Oro Property - New Mexico, USA**

Pursuant to an agreement dated August 28, 2006, as amended, the Company owns a 100% interest in several patented and unpatented mining claims in the Eureka Mining District, Grant County, New Mexico.

The property is subject to a 2% NSR payable to the optionors whom have granted the Company an option to purchase the NSR at any time in 0.5% increments at US \$500,000 for each increment.

Pursuant to an agreement effective December 1, 2007, as amended, the Company owns a 100% interest in the American Mine claims consisting of eight patented lode mining claims and surface rights to a contiguous property. The American Mine claims are adjacent to the above claims.

Pursuant to a lease with option to purchase agreement dated May 1, 2011, the Company can earn a 100% interest in six unpatented lode mining claims in the Eureka Mining District, Grant County, New Mexico.

Remaining lease payments are due as follows:

- (i) US \$6,000 annually from May 1, 2014 to May 1, 2017;
- (ii) US \$30,000 annually from May 1, 2018 to May 1, 2024; and
- (iii) US \$60,000 annually from May 1, 2025 to May 1, 2031.

The Company can purchase the property at any time by paying any amounts remaining under the lease. The property is subject to a 1% NSR payable to the optionors, which terminates when aggregate payments thereunder equal US \$500,000.

### **5. Mineral Properties, continued**

#### **(c) Oro Property - New Mexico, USA, continued**

Pursuant to an agreement dated January 14, 2013, the Company granted Desert Star the right to earn up to an undivided 70% interest in the property.

To acquire the initial 51% interest Desert Star shall:

- (i) Pay to the Company US \$75,000 on agreement execution (received) and US \$150,000 on or before August 1, 2013 (received);
- (ii) Issue 100,000 common shares on February 5, 2013 (the "Effective Date") (issued);
- (iii) Issue 150,000 common shares and incur aggregate exploration expenditures of US \$800,000 on or before 18 months from the Effective Date;
- (iv) Issue 250,000 common shares and incur aggregate exploration expenditures of US \$1,400,000 on or before 30 months from the Effective Date; and
- (v) Issue 500,000 common shares and incur aggregate exploration expenditures of US \$3,000,000 on or before 42 months from the Effective Date;

To acquire the additional 19% interest, Desert Star shall elect to do so within 90 days from the date of acquisition of the initial 51 % interest and:

- (i) Complete a Preliminary Economic Assessment and incur aggregate exploration expenditures of US \$6,000,000 on or before 66 months from the Effective Date.

#### **(d) Dragoon Property - Arizona, USA**

Pursuant to an agreement dated August 28, 2007, as amended, the Company can earn a 100% interest in certain claims located in the state of Arizona.

The final remaining staged payment of US \$300,000 was due on or before August 28, 2013, and the Company is currently negotiating a revised agreement.

The property is subject to a 2% NSR payable to the optionors whom have granted the Company an option to purchase the NSR at any time in 0.5% increments at US \$500,000 for each increment.

### 6. Related Party Balances and Transactions

In addition to those transactions disclosed elsewhere in these condensed consolidated interim financial statements, the Company entered into the following related party transactions during the six months ended October 31, 2013:

(a) Under a service agreement, as amended, between the Company and a private company controlled by a director and an officer of the Company, the Company was charged for recoupment of amounts paid to employees for the provision of services and for expenses paid to third parties, as follows:

- \$63,000 (2012 - \$58,000) for office space and general administration services;
- \$38,555 (2012 - \$26,286) for professional services;
- \$15,476 (2012 - \$10,600) for consulting services;
- \$15,550 (2012 - \$33,235) for investor relations services;
- \$21,788 (2012 - \$28,830) for geological consulting services in relation to mineral properties;
- \$1,038 (2012 - \$1,530) for the mark-up on out-of-pocket expenses; and
- \$68 (2012 - \$413) for office and general.

Amounts payable as at October 31, 2013 were \$38,547 (April 30, 2013 - \$67,141).

(b) Pursuant to a consulting agreement, as amended, between the Company and a director and an officer of the Company, the Company was charged \$56,160 (2012 - \$56,160) for consulting services. Amounts payable as at October 31, 2013 were \$34,584 (April 30, 2013 - \$18,443).

(c) Fees in the amount of \$37,356 (2012 - \$36,259) were charged by a law firm controlled by a director and an officer of the Company and included in professional fees, share issue costs and mineral property expenditures. Amounts payable as at October 31, 2013 were \$22,224 (April 30, 2013 - \$9,141).

(d) Fees in the amount of \$nil (2012 - \$6,401) were charged by a director of the Company for geological services. No amounts were payable as at October 31, 2013 and April 30, 2013.

(e) Fees in the amount of \$2,500 (2012 - \$15,000) were charged by a private company controlled by a director and an officer of the Company for consultancy services. Amounts payable as at October 31, 2013 were \$3,350 (April 30, 2013 - \$8,225). Agreement expired effective May 30, 2013.

(f) Fees in the amount of \$nil (2012 - \$nil) were charged by a private company controlled by a former director and officer of the Company for consultancy services and included in consulting fees and share issue costs. Amounts payable as at October 31, 2013 and April 30, 2013 were \$15,106.

(g) Fees in the amount of \$3,000 (2012 - \$nil) were charged by an officer of the Company for consultancy services. Amounts payable as at October 31, 2013 were \$4,500 (April 30, 2013 - \$nil).

(h) Fees of \$17,671 (2012 - \$16,490) were payable with respect to independent directors' fees. As at October 31, 2013 \$39,796 was outstanding and included in accounts payable and accrued liabilities (2013 - \$21,622).

These transactions were in the normal course of operations and were measured at the fair value of the services rendered. Amounts due to related parties are unsecured, non-interest-bearing, and have no formal terms of repayment.

### 6. Related Party Balances and Transactions, continued

The key management personnel of the Company are the directors and officers of the Company. One executive officer is entitled to termination benefits in the event of a change of control equal to one hundred percent of the compensation that would have been paid during the unexpired term of their agreement. The remaining balance payable under the agreement termination clause as at October 31, 2013 was \$74,880. The Company has no long-term employee or post-employment benefits. Compensation awarded to key management, included in (b), (d), (e), (g) and (h) above, was as follows:

	2013	2012
Short-term benefits	\$ 81,331	\$ 94,051
Total	\$ 81,331	\$ 94,051

### 7. Loans Payable

During August 2012, the Company entered into two loan agreements, one with a private company controlled by a director and the other with a private company controlled by a consultant, for \$33,000 and \$15,000 respectively. The initial term of the loans was for a period of six months with interest payable quarterly at prime plus two percent per annum. As further consideration for providing the loans, the lenders also received common shares equal to ten per cent of the value of the loan.

No amounts were repaid and therefore all outstanding balances are now repayable on demand. The Company, in its sole discretion, can elect to repay all interest and loan balances by the issuance of common shares.

### 8. Share Capital

The authorized share capital of the Company consists of an unlimited number of common shares without par value.

#### (a) Equity Financings

On September 13, 2013, the Company closed the first tranche of a non-brokered private placement and issued 6,830,150 units at a price of \$0.02 per unit for gross proceeds of \$136,603. On October 11, 2013, the Company closed the second tranche of the private placement by issuing 18,200,000 units at a price of \$0.02 per unit for gross proceeds of \$364,000.

Each unit consisted of one common share and one share purchase warrant, with each warrant exercisable to purchase one additional common share for a period of three years at an exercise price of \$0.05 per share.

The Company also issued 875,000 finders' warrants at an exercise price of \$0.05 per share expiring on September 13, 2016, with a fair value of \$8,005 (Note 8(d)), and 917,500 finders' warrants at an exercise price of \$0.05 per share expiring on October 11, 2016, with a fair value of \$9,896 (Note 8(d)).

#### (b) Stock Options

The Company has a rolling stock option plan (the "Plan") that allows for the reservation of common shares issuable under the Plan to a maximum of 10% of the number of issued and outstanding common shares of the Company at any given time. The term of stock options granted under the Plan may not exceed ten years and the exercise price may not be less than the closing price of the Company's shares on the last business day immediately preceding the date of grant, less any permitted discount. On an annual basis, the Plan requires approval by the Company's shareholders and submission for regulatory review and acceptance.

#### (d) Fair Value Determination

The fair value of finders' warrants issued and stock options granted were calculated using the Black-Scholes option pricing model with the following weighted average assumptions:

	2013		2012
	Options	Warrants	Options
Risk-free interest rate	N/A	1.47%	1.20%
Expected share price volatility	N/A	110.01%	121.09%
Expected option/warrant life (years)	N/A	3.00	5.00
Expected dividend yield	N/A	0.00%	0.00%

The expected volatility assumptions have been developed taking into consideration both historical and implied volatility of the Company's share price.

The total calculated fair value of share-based payments for the six months ended October 31, 2013 and 2012, were included in the condensed consolidated interim statements of comprehensive loss as follows:

	2013	2012
Consolidated Statements of Comprehensive Loss		
Directors and officers	\$ -	\$ -
Consultants	-	24,269
	-	24,269
Consolidated Statements of Changes in Equity		
Finders' warrants	17,901	-
Total	\$ 17,901	\$ 24,269

### 9. Segmented Information

The Company conducts its business as a single operating segment, being the acquisition and exploration of mineral properties. The Company's non-current assets were distributed by geographic location as follows:

	October 31, 2013		April 30, 2013	
	\$	%	\$	%
Mexico	1,389,218	53%	1,865,924	59%

### D. Summary of Mineral Properties

The Company is currently exploring for precious and base metals in Mexico (Durango) and the USA (Arizona and New Mexico).

#### Cerro Las Minitas - Durango, Mexico

The property lies within the Faja de Plata (Belt of Silver), is located about 70 kilometres to the northeast of the city of Durango in Durango State, Mexico, and is accessed easily by road. The property comprises 18 concessions totaling 15,125 hectares in one of the most significant silver producing regions in the world with current reserves/resources and historic production in excess of 3 billion ounces of silver. Certain claims are subject to receipt of registered title, failing receipt of which, will result in a reduction to final option payment obligations.

In October 2012, the Company signed an earn-in agreement with Freeport-McMoRan Exploration Corporation ("FMEC") through which FMEC could acquire an indirect 70% interest in the property. During September 2013, the Company received notice from FMEC that its affiliate had acquired an interest in additional mineral rights ("El Sol Concession") within the defined area of interest. FMEC offered, and the Company agreed, to include the El Sol Concession under the agreement.

Since execution, FMEC has completed a program of soil and vegetation geochemistry and geophysical surveys over the entire property, three additional lines of deep-penetrating IP geophysics and a gravity survey that have confirmed both the lateral extent of anomalies identified in earlier work completed by the Company and have significantly extended the projection of several of the existing targets to over 600 metres depth.

FMEC completed an initial 8 core hole, 3,445 metre drill program in early 2013 that targeted both lateral and vertical offsets to known mineralized zones at the Blind Zone, El Sol Zone and South Skarn targets as well as several geophysical and geochemical targets throughout the property, which was successful in both confirming the distribution of high-grade mineralization in the Blind Zone and identifying significant extensions of mineralization at each of El Sol Zone and South Skarn targets.

##### *Blind Zone - El Sol Zone*

Multiple mineralized intercepts have been identified in most drill holes and are open in all directions. A preliminary interpretation of the drill data suggests good continuity within three main mineralized structures associated with monzonitic and felsic intrusives and several secondary footwall and hanging wall zones. Initial drilling in early 2011 identified high-grade silver mineralization in the El Sol Zone, an area located approximately 150 metres to the east of the Blind Zone mineralization.

Geological modeling using a nominal 80g/t AgEq cut-off has identified multiple distinct mineralized structures with a 820 metre cumulative strike-length, with depth projections of up to 300 metres below surface. Mineralization occurs in sub-vertical structures that demonstrate good continuity between drill holes. True thickness of the mineralized intervals are estimated at 60% to 70% of the down hole thicknesses. A Reconnaissance IP survey covering the remainder of the concessions has identified new, previously undetected targets in gravel covered areas for further surface exploration and potential drill testing.

A single west to east oriented 680 metre drill hole previously tested both a shallow offset of mineralization within the Blind Zone and the depth projection of mineralization in the El Sol Zone, and returned extremely encouraging results which confirm the continuity of shallow high-grade silver mineralization in the upper portions of the Blind Zone. The deeper intercepts project to previously identified, near surface, mineralization in the El Sol Zone which had been tested during 2012 exploration to less than 200 metres depth. The intercepts are reported as down-hole thickness. True thickness of the mineralized intervals is estimated at about 40% of the reported thickness.

##### *La Bocona*

This target area is located 750 metres to the northeast of the Blind Zone deposit and mineralization is open along strike for several hundred metres. Previous drilling tested a northwest extension of the deposit and returned a 1.3 metre interval grading 466g/t silver. Mineralization occurs within skarn and hornfels limestone on the eastern margin of a thick northwest-trending felsic dyke.

Additional drilling is planned to further test and delineate this zone of mineralization.

##### *South Skarn*

This zone of gold-copper mineralization is gravel covered and is located approximately 1.5 kilometres to the southeast of the Blind Zone deposit and is open in all directions.

Previous drilling intersected an outer zone of weakly to moderately altered limestone followed by a 37 metre thick diatreme breccia, an intermixed zone of hematite breccia, skarn-hornfels and aplite dyke before entering variably altered monzonite/feldspar porphyry. Strongly anomalous gold mineralization was identified over a 20 metre interval within the hematite breccia which averaged 0.8g/t gold and included a 4.3 metre interval averaging 2.8g/t gold and 28g/t silver. A second 4.3 metre interval averaging 1.4g/t gold, 89g/t silver and 1.8% copper was intersected further down hole and is hosted in chlorite-garnet skarn related to the adjacent intrusions.

#### D. Summary of Mineral Properties, continued

##### Cerro Las Minitas - Durango, Mexico, continued

Mineralization in the South Skarn target is open both along strike to the northeast and at depth. Accurate orientations of the mineralized zones have not been determined; however mineralization appears to dip moderately to steeply southward. True thickness of the mineralized intervals may be up to +70% of the reported thickness.

##### 2013/14 Exploration Program

FMEC initiated a second phase of drilling on the property which started in November 2013. Exploration plans are for approximately 4,000 metres of core drilling. An initial seven sites have been selected for testing as a follow-up on earlier drilling, which was successful in confirming both the distribution of high-grade mineralization in the Blind zone and identifying significant extensions of mineralization at each of the El Sol and South Skarn targets.

The proposed drilling will continue to test the lateral extensions of the El Sol and Blind zone mineralization and includes one hole on the El Sol concession which could extend the on-strike potential of the previously identified zones of mineralization by upwards of 800 metres. An initial drill hole is planned to test the depth extension of mineralization at Mina Santo Nino, one of several historic small mining operations on the project, and two deep holes of up to 1,000 metres each are planned to test skarn targets on the flanks of the central intrusion. A third deep hole is planned as a test of IP and gravity geophysical anomalies outboard and to the northeast of the central intrusion.

### **D. Summary of Mineral Properties, continued**

#### **Cerro Las Minitas - Durango, Mexico, continued**

FMEC has advised that the El Sol Concession is in the early stage of exploration with no indicated resource in a highly prospective district. The high grade silver- lead- zinc system in which it lies has showings that have had small production in the past, and strong IP geophysics demonstrate buried intrusive and sulfide mineralization that indicate excellent drill targets. IP results from the El Sol Concession will be incorporated into data compilation and interpretation from the recently completed first exploration program on the Cerro Las Minitas Project toward potential follow-up drilling in one or more of the target areas.

#### **Minas de Ameca - Jalisco, Mexico**

The Company is currently in the process of relinquishing its interests in the Magistral and El Magistral concessions.

#### **Oro - New Mexico, USA**

The Oro Project comprises a contiguous block of Federal, State and private land totaling 17.2 square kilometres in the historic Eureka mining district in Grant County, New Mexico and is located approximately 80 kilometres southwest of the Silver City porphyry copper district. The claims surround a highly prospective 6 square kilometre quartz-sericite-pyrite alteration footprint, interpreted to overlie an unexposed porphyry centre. Classic porphyry system zonation is indicated by surface gold and copper mineralization associated with Laramide-age intrusions in this core area, flanked by lead-zinc skarn mineralization and distal sediment-hosted gold occurrences.

In addition to bulk-tonnage porphyry copper-molybdenum-gold potential, the Oro project claims also include the high-grade sediment-hosted Stock Pond gold target. Reconnaissance rock sampling has been completed over a strike length of 140 metres, yielding values up to 4.8 grams per tonne gold. Gold mineralization is interpreted to be related to the main porphyry centre, located 4 kilometres to the southwest.

In January 2013, the Company entered into an option agreement with Desert Star Resources Ltd. (DSR.V, "Desert Star") whereby Desert Star can acquire up to a 70% interest in the property. Desert Star is assuming operation of the project and intends to conduct a systematic exploration program in 2013 which includes a detailed deep-penetrating geophysical program, surface mapping, sampling, trenching and diamond drilling to test both the porphyry potential on the property as well as the gold potential at Stock Pond.

#### **Dragoon Property - Arizona, USA**

The Dragoon property is a contiguous claim block of 1,280 ha, located 90 kilometers southeast of Tucson, Arizona, comprising 68 unpatented mining claims and 4 state leases that contain areas of exposed Cu-Mo mineralization, Laramide-age monzogranite porphyry and geothitic "leached capping" which occur in the eastern part of the property and a larger down-dropped block of prospective Paleozoic stratigraphy in the gravel-covered western portion of the property.

The Company is currently analyzing historic geological data with the intent to complete further exploration work on the property.

#### E. Results of Operations

During the six months ended October 31, 2013, the Company recognized net loss and comprehensive income of \$616,171 (2012 - \$805,989). The following table summarizes the variances in the consolidated statements of comprehensive loss:

	2013	2012	Variance	
	\$	\$	\$	%

Mineral property impairment	369,010	-	(369,010)	-
Unrealized gain on fair value of marketable securities	(8,000)	-	8,000	-

Administration expenses increased as a result of an amended office services agreement entered into on July 1, 2012.

Investor relations, shareholders' communications and travel and promotion expenses fluctuate based on the number of conferences and trade shows attended and other work performed in preparation of financing activities.

As per the Company's mandate to acquire, explore, and develop mineral resource properties, the Company has continued to invest in its current properties based on financial resources that have been available. During the period, the Company recovered current and prior period exploration costs under its earn-in agreement with FMEC.

Non-cash share-based payments vary as stock options are granted and vest.

The Company has not been compliant with some underlying terms of the Magistral property agreement since July 2011 and has been negotiating a revised agreement since that date. However, the Company is now currently in the process of returning the property to the optionor which may include ownership of the El Magistral property. Accordingly, the Company recorded an impairment provision against all capitalized costs relating to these claims.

Foreign exchange gains and losses fluctuate based on the US and Canadian dollar exchange rate.

### Management's Discussion and Analysis

For the Six Months Ended October 31, 2013

#### F. Summary of Quarterly Results

The following financial data was derived from the Company's consolidated financial statements for the eight previous quarters:

	Oct 31, 2013 \$	Jul 31, 2013 \$	Apr 30, 2013 \$	Jan 31, 2013 \$	Oct 31, 2012 \$	Jul 31, 2012 \$	Apr 30, 2012 \$	Jan 31, 2012 \$
Net loss	570,446	53,725	476,895	(166,292)	282,508	523,481	1,721,296	1,627,000
Basic and diluted loss per share	\$ 0.00	\$ 0.00	\$ 0.00	\$ (0.00)	\$ 0.00	\$ 0.00	\$ 0.01	\$ 0.01

The Company earned no revenue during the periods presented other than minimal interest income due to the nature of current operations.

Quarterly fluctuations mainly relate to recognition of share-based payments which vary as stock options are granted and vest, foreign exchange gains and losses which vary with market rates and mineral property exploration expenses or impairments which occur as projects are identified and drilling results are analyzed.

During the year ended April 30, 2013, the Company entered into an earn-in agreement with FMEC under which the Company receives payments, as part of work expenditure commitments, which are recognized when received in profit or loss.

#### G. Related Party Transactions

The Company entered into the following related party transactions during the six months ended October 31, 2013:

- (a) Under a service agreement, as amended, between the Company and a private company controlled by a director and an officer of the Company, the Company was charged for recoupment of amounts paid to employees for the provision of services and for expenses paid to third parties, as follows:
- \$63,000 (2012 - \$58,000) for office space and general administration services;
  - \$38,555 (2012 - \$26,286) for professional services;
  - \$15,476 (2012 - \$10,600) for consulting services;
  - \$15,550 (2012 - \$33,235) for investor relations services;
  - \$21,788 (2012 - \$28,830) for geological consulting services in relation to mineral properties;
  - \$1,038 (2012 - \$1,530) for the mark-up on out-of-pocket expenses; and
  - \$68 (2012 - \$413) for office and general.

Amounts payable as at October 31, 2013 were \$38,547 (April 30, 2013 - \$67,141).

- (b) Pursuant to a consulting agreement, as amended, between the Company and a director and an officer of the Company, the Company was charged \$56,160 (2012 - \$56,160) for consulting services. Amounts payable as at October 31, 2013 were \$34,584 (April 30, 2013 - \$18,443).

#### G. Related Party Transactions, continued

- (c) Fees in the amount of \$37,356 (2012 - \$36,259) were charged by a law firm controlled by a director and an officer of the Company and included in professional fees, share issue costs and mineral property expenditures. Amounts payable as at October 31, 2013 were \$22,224 (April 30, 2013 - \$9,141).
- (d) Fees in the amount of \$nil (2012 - \$6,401) were charged by a director of the Company for geological services. No amounts were payable as at October 31, 2013 and April 30, 2013.
- (e) Fees in the amount of \$2,500 (2012 - \$15,000) were charged by a private company controlled by a director and an officer of the Company for consultancy services. Amounts payable as at October 31, 2013 were \$3,350 (April 30, 2013 - \$8,225). Agreement expired effective May 30, 2013.
- (f) Fees in the amount of \$nil (2012 - \$nil) were charged by a private company controlled by a former director and officer of the Company for consultancy services and included in consulting fees and share issue costs. Amounts payable as at October 31, 2013 and April 30, 2013 were \$15,106.
- (g) Fees in the amount of \$3,000 (2012 - \$nil) were charged by an officer of the Company for consultancy services. Amounts payable as at October 31, 2013 were \$4,500 (April 30, 2013 - \$nil).
- (h) Fees of \$17,671 (2012 - \$16,490) were payable with respect to independent directors' fees. As at October 31, 2013 \$39,796 was outstanding and included in accounts payable and accrued liabilities (2013 - \$21,622).

These transactions were in the normal course of operations and were measured at the fair value of the services rendered. Amounts due to related parties are unsecured, non-interest-bearing, and have no formal terms of repayment.

The key management personnel of the Company are the directors and officers of the Company. One executive officer is entitled to termination benefits in the event of a change of control equal to one hundred percent of the compensation that would have been paid during the unexpired term of their agreement. The remaining balance payable under the agreement termination clause as at October 31, 2013 was \$74,880. The Company has no long-term employee or post-employment benefits. Compensation awarded to key management, included in (b), (d), (e), (g) and (h) above, was as follows:

	2013	2012
Short-term benefits	\$ 81,331	\$ 94,051
Total	\$ 81,331	\$ 94,051

During August 2012, the Company entered into a loan agreement with a private company controlled by a director for \$33,000.

The initial term of the loan was for a period of six months with interest payable quarterly at prime plus two percent per annum. As further consideration for providing the loan, the lender also received common shares equal to ten per cent of the value of the loan.

No amounts were repaid and therefore all outstanding balances are now repayable on demand. The Company, in its sole discretion, can elect to repay all interest and loan balances by the issuance of common shares.

Management's Discussion and Analysis

For the Six Months Ended October 31, 2013

---

### **H. Financial Condition, Liquidity and Capital Resources**

As at October 31, 2013, the Company had a working capital deficiency of \$346,494 (April 30, 2013 - \$726,154). The Company has been reducing general and administration costs, where possible, negotiating extended payment terms of its trade payables, and reviewing its capital expenditure plan and future commitments to identify opportunities to reduce or delay spending and payments. However, the Company does not generate any revenue from operations and, without further financing, the Company does not have sufficient capital to meet the requirements for its administrative overhead, maintaining its mineral interests and continuing with its exploration program in the following twelve months.

For the foreseeable future, the Company will need to rely on raising capital in the equity markets and/or enter into further joint venture agreements with third parties to provide working capital and to finance its mineral property acquisition and exploration activities. Although the Company has been successful in obtaining financing through sale of its securities, there can be no assurance that the Company will be able to obtain adequate financing in the future in light of factors such as the market demand for its securities, the general state of financial markets and other relevant factors.

Failure to obtain such additional financing could result in delay or indefinite postponement of further exploration and development of its projects with a possible loss of some properties and reduction or termination of operations.

#### *Commitments*

Effective July 1, 2012, under an amended service agreement between the Company and a private company controlled by a director and officer of the Company, the Company is charged \$10,500 per month for office accommodation and services ("Basic Rent") and \$1,750 per month per dedicated office ("Specific Rent"). The Company may terminate the agreement through written notice at any time by paying the Basic and Specific Rents for the lesser of 24 months or the remainder of the term. The agreement expires on August 31, 2017, and the remaining minimum fee commitment based on current rental space as at October 31, 2013 is \$252,000.

### **K. Financial Instruments**

The Company's financial instruments include cash, other receivables, marketable securities, reclamation bonds, accounts payable and accrued liabilities, amounts due to related parties and loans payable.

These financial instruments have no material risk exposure. Risk is managed with respect to cash by risk management policies that require cash deposits or short-term investments be invested with Canadian chartered banks rated BBB or better, or commercial paper issuers R1/A2/P2 or higher. In addition, all investments must be less than one year in duration.

### **L. Off-Balance Sheet Arrangements**

The Company does not have any off-balance sheet arrangements and does not contemplate having them in the foreseeable future.

### **M. Disclosure Controls and Procedures**

The Board of Directors, through its Audit Committee, is responsible for ensuring that management fulfills its responsibilities for financial reporting and internal control.

The Audit Committee is composed of three independent directors, who meet at least quarterly with management and, at least annually with the external auditors to review accounting, internal control, financial reporting, and audit matters.

There have been no significant changes to the Company's internal control over financial reporting that occurred during the period that have materially affected, or are reasonably likely to materially affect the Company's internal control over financial reporting.

The audit committee has established procedures for complaints received regarding accounting, internal controls or auditing matters, and for a confidential, anonymous submission procedure for employees who have concerns regarding questionable accounting or auditing matters.

The Whistleblower policy is in accordance with National Instrument 52-110 Audit Committees, National Policy 58-201 Corporate Governance Guidelines and National Instrument 58-101 Disclosure of Corporate Governance Practices.

Being a venture issuer, the Company is exempted from the certification on Disclosure Controls and Procedures and Internal Control Over Financial Reporting. The Company is required to file Form 52-109FV1 for annual reporting and Form 52-109FV2 for interim reporting.

### **N. Risks and Uncertainties**

The principal business of the Company is the acquisition, exploration and development of mineral properties. Given the nature of the mining business, the limited extent of the Company's assets and the present stage of development, the following risk factors, among others, should be considered:

#### *Exploration Stage Company*

The Company does not hold any known mineral reserves of any kind and does not generate any revenues from production. The Company's success will depend largely upon its ability to locate commercially productive mineral reserves. Mineral exploration is highly speculative in nature, involves many risks and frequently is non-productive. There is no assurance that exploration efforts will be successful. Success in establishing reserves is a result of a number of factors, including the quality of management, the level of geological and technical expertise, and the quality of property available for exploration.

Once mineralization is discovered, it may take several years in the initial phases of drilling until production is possible, during which time the economic feasibility of production may change. Substantial expenditures are required to establish proven and probable reserves through drilling and bulk sampling, to determine the optimal metallurgical process to extract the metals from the ore and, in the case of new properties, to construct mining and processing facilities.

Because of these uncertainties, no assurance can be given that our exploration programs will result in the establishment or expansion of resources or reserves.

#### *No Operating History and Availability of Financial Resources*

The Company does not have an operating history and has no operating revenues and is unlikely to generate any significant amount in the foreseeable future. Hence, it may not have sufficient financial resources to undertake by itself all of its planned mineral property acquisition and exploration activities. Operations will continue to be financed primarily through the issuance of securities.

The Company will need to continue its reliance on the issuance of such securities for future financing, which may result in dilution to existing shareholders. Furthermore, the amount of additional funds required may not be available under favorable terms, if at all. Failure to obtain additional funding on a timely basis could result in delay or indefinite postponement of further exploration and development and could cause the Company to forfeit its interests in some or all of its properties or to reduce or discontinue its operations.

#### *Price Volatility and Lack of Active Market*

In recent months, the securities markets in Canada and elsewhere have experienced a high level of price and volume volatility, and the market prices of securities of many public companies have experienced significant fluctuations in price which have not necessarily been related to the operating performance, underlying asset values or prospects of such companies. It may be anticipated that any quoted market for the Company's securities will be subject to such market trends and that the value of such securities may be affected accordingly. If an active market does not develop, the liquidity of the investment may be limited and the market price of such securities may decline below the subscription price.

### **N. Risks and Uncertainties, continued**

#### *Competition*

The resource industry is intensively competitive in all of its phases, and the Company competes with many other companies possessing much greater financial and technical resources. Competition is particularly intense with respect to the acquisition of desirable undeveloped properties. The principal competitive factors in the acquisition of prospective properties include the staff and data necessary to identify and investigate such properties, and the financial resources necessary to acquire and develop the projects. Competition could adversely affect the Company's ability to acquire suitable prospects for exploration.

#### *Government Regulations and Environmental Risks and Hazards*

The Company conduct is subject to various federal, provincial, state laws, rules and regulations, including environmental legislation. Environmental legislation is becoming increasingly stringent and costs and expenses of regulatory compliance are increasing. The impact of new and future environmental legislation on the Company's operations may cause additional expenses and restrictions. If the restrictions adversely affect the scope of exploration and development on the resource property interests, the potential for production on the property may be diminished or negated.

The Company has adopted environmental practices designed to ensure that it continues to comply with environmental regulations currently applicable to it. All of the Company's activities are in compliance in all material respects with applicable environmental legislation. Environmental hazards may exist on the Company's properties, which may have been caused by previous or existing owners or operators of the properties. The Company is not aware of any existing environmental hazards related to any of its current property interests that may result in material liability to the Company.

#### *Title to Property*

Although the Company has exercised the usual due diligence with respect to title to properties in which it has a material interest, there is no guarantee that title to the properties will not be challenged or impugned. The Company's mineral property interest may be subject to prior unregistered agreements or transfers, aboriginal land claims, government expropriation and title may be affected by undetected defects. In addition, certain mining claims in which the Company has an interest are not recorded in the name of the Company and cannot be recorded until certain steps are taken by other parties.

#### *Dependence on Key Personnel*

The Company is dependent on a relatively small number of key directors, officers and senior personnel. Loss of any one of those persons could have an adverse effect on the Company. The Company does not currently maintain "key-man" insurance in respect of any of its management.

#### *Licenses and Permits*

The operations of the Company require licenses and permits from various government authorities. The Company believes that it holds all necessary licenses and permits under applicable laws and regulations for work in progress and believes it is presently complying in all material respects with the terms of such licenses and permits. However, such licenses and permits are subject to change in various circumstances. There can be no guarantee that the Company will be able to obtain or maintain all necessary licenses and permits that may be required to explore and develop its properties, commence construction or operation of mining facilities or to maintain continued operations that economically justify the cost.

### **O. Proposed Transactions**

Other than normal course review of monthly submittals, there are no new acquisitions or proposed transactions contemplated as at the date of this report.

### **P. Forward-Looking Statements**

Some of the statements contained in this MD&A may be deemed "forward-looking statements." These include estimates and statements that describe the Company's future plans, objectives or goals, and expectations of a stated condition or occurrence. Forward-looking statements may be identified by the use of words such as "believes", "anticipates", "expects", "estimates", "may", "could", "would", "will", or "plan". Since forward-looking statements are based on assumptions and address future events and conditions, by their very nature they involve inherent risks and uncertainties.

Actual results relating to, among other things, results of exploration, reclamation, capital costs, and the Company's financial condition and prospects, could differ materially from those currently anticipated in such statements for many reasons such as but not limited to; changes in general economic conditions and conditions in the financial markets; changes in demand and prices for the minerals the Company expects to produce; litigation, legislative, environmental and other judicial, regulatory, political and competitive developments; technological and operational difficulties encountered in connection with the Company's activities; changing foreign exchange rates and other matters discussed in this MD&A.

Readers should not place undue reliance on the Company's forward-looking statements. Further information regarding these and other factors, which may cause results to differ materially from those projected in forward-looking statements, are included in the filings by the Company with securities regulatory authorities. The Company does not assume any obligation to update or revise any forward-looking statement that may be made from time to time by the Company or on its behalf, except in accordance with applicable securities laws, whether as a result of new information, future events or otherwise.
